To the Shareholders of Kuwait Financial Centre – KPSC Kuwait

Report on the Audit of the Consolidated Financial Statements

Opinion

We have audited the consolidated financial statements of Kuwait Financial Centre - Kuwaiti Public Shareholding Company (the "Parent Company") and Subsidiaries, (collectively the "Group"), which comprise the consolidated statement of financial position as at 31 December 2023, and the consolidated statement of profit or loss, consolidated statement of profit or loss and other comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including material accounting policy information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at 31 December 2023, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS Accounting Standards) as adopted by Central Bank of Kuwait ("CBK") for use in the State of Kuwait.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code), and we have fulfilled our other responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current year. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matter described below as the key audit matter.

Management fees and commission income

The Group manages various funds and portfolios on a fiduciary basis for its customers. In addition, the Group provides corporate advisory and other financial services to clients in debt and capital markets. The Group recognized management fees and commission income arising from these services of KD8,013 thousand for the year ended 31 December 2023 (31 December 2022: KD11,269 thousand) as disclosed in the consolidated statement of profit or loss. The recognition of management fees and commission income is dependent on the terms of the underlying management contracts and corporate advisory mandates agreed between the Group and its clients and/or the funds it manages. Management fees are calculated as a percentage of net asset value of the Assets Under Management as contractually agreed with its customers and varies across different funds and products. Due to the inherent risk of fraud associated with revenue recognition and the complexities in the revenue recognition process as described above, we have considered this as a key audit matter. The Group's policy on revenue recognition is disclosed in note 5.3 to the consolidated financial statements.

Independent auditors' report to the Shareholders of Kuwait Financial Centre - KPSC (continued)

Management fees and commission income (continued)

Our audit procedures included, among others, evaluating the design and implementation of controls management has put in place over valuing underlying fiduciary assets. We have also selected samples of portfolios/funds under management and verified if the underlying assets in those portfolios are fair valued based on market quotes as of the year-end date. We have also re-computed the related management fee on the selected sample of Portfolios/funds by applying the contractually agreed management fee with the customers on the net asset value of those portfolios. We assessed the disclosures included in the consolidated financial statements relating to this matter against the requirements of IFRS Accounting Standards.

Other Information included in the Group's 2023 annual report

Management is responsible for the other information. Other information consists of the information included in the Annual Report of the Group for the year ended 31 December 2023, other than the consolidated financial statements and our auditors' report thereon. We obtained the report of the Parent Company's Board of Directors, prior to the date of our auditors' report, and we expect to obtain the remaining sections of the Group's Annual Report for the year ended 31 December 2023 after the date of our auditors' report.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed on the other information that we obtained prior to the date of this auditors' report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS Accounting Standards as adopted by CBK for use in the State of Kuwait, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting, unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

Deloitte.

Independent auditors' report to the Shareholders of Kuwait Financial Centre - KPSC (continued)

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements (continued)

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether
 due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
 evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a
 material misstatement resulting from fraud is higher than for one resulting from error, as fraud may
 involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business
 activities within the Group to express an opinion on the consolidated financial statements. We are
 responsible for the direction, supervision and performance of the Group audit. We remain solely
 responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current year and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Deloitte.

Independent auditors' report to the Shareholders of Kuwait Financial Centre - KPSC (continued)

Report on Other Legal and Regulatory Requirements

Furthermore, in our opinion proper books of account have been kept by the Parent Company and the consolidated financial statements, together with the contents of the report of the Parent Company's Board of Directors relating to these consolidated financial statements, are in accordance therewith. We further report that we obtained all the information and explanations that we required for the purpose of our audit and that the consolidated financial statements incorporate all information that is required by the Companies Law No 1 of 2016 and its Executive Regulations, as amended, and by the Parent Company's Memorandum of Incorporation and Articles of Association, as amended, that an inventory was duly carried out and that, to the best of our knowledge and belief, no violations of the Companies Law, the Executive Regulations, or of the Parent Company's Memorandum of Incorporation and Articles of Association, as amended, have occurred during the year ended 31 December 2023 that might have had a material effect on the business or financial position of the Parent Company.

We further report that, during the course of our audit, we have not become aware of any violations of the provisions of Law No. 32 of 1968, as amended, concerning currency, the Central Bank of Kuwait and the organisation of banking business, and its related regulations, or of the provisions of Law No. 7 of 2010, concerning the Capital Markets Authority and its related regulations during the year ended 31 December 2023 that might have had a material effect on the business or on its financial position of the Parent Company.

Notes to the consolidated financial statements

1 Incorporation and activities

Kuwait Financial Centre – KPSC ("the Parent Company") was incorporated in 1974 in accordance with the Commercial Companies Law in the State of Kuwait. The Parent Company along with its subsidiaries are jointly referred to as "the Group". The Parent Company is listed on the Boursa Kuwait and is governed under the directives of the Central Bank of Kuwait and Capital Markets Authority of Kuwait.

The principal activities of the Parent Company are as follows:

- Funding import and export operations, whether by direct credit or accepting drafts drawn on the company for short terms, as well as brokerage in securing the banking facilities for clients in Kuwait and abroad.
- Undertake the job of broker between borrowers and lenders, undertake approved agency works for the payment processes arising from issuing medium and long term securities, in addition to keeping securities on behalf of the clients.
- Dealing and trading in the foreign currencies and the precious metal markets inside and outside Kuwait.
- Undertake all the services which assist to extend and support the money and capital market capacity in Kuwait and fulfil its needs within the limits of the law and the procedures or instructions issued by the Central Bank of Kuwait. The company may have an interest or participate in any manner with the bodies practicing business similar to its business or which may assist it to achieve its objectives inside or outside Kuwait and it may acquire such bodies or append them to itself.
- Offering personal, commercial and consumer loans, undertake finance operations on the basis of margin related to investment operations in the local and international markets, trading currencies, as well as the finance operations related to pledging investment portfolios and securities, and undertaking finance and brokerage in international and local commercial operations.
- Investment in the various economic sectors such as the industrial, real estate, agricultural, services and other sectors, whether directly or by contribution through existing companies or incorporating these companies related to the said activity or acquire projects which fulfil such objective.
- Undertake the functions of investment trustees and investment portfolio management for the account of third parties with the required loaning and borrowing operations.
- Unregistered securities broker in the stock exchange.
- Investment portfolio manager.
- Collective investment scheme manager.
- Investment advisor.
- Placement agent.
- Custodian.

The address of the Parent Company's registered office is PO Box 23444, Safat 13095, Burj Al Shaya, Floor 8, Al Soor Street, Al Mirqab, Kuwait City, State of Kuwait.

The Parent Company's Board of Directors approved these consolidated financial statements for issue on 14 February 2024 and are subject to the approval of the General Assembly of the shareholders of the Parent Company.

2 Basis of preparation

The consolidated financial statements of the Group have been prepared under historical cost convention except for financial assets at fair value through profit or loss, financial liabilities at fair value through profit or loss and derivative financial instruments that have been measured at fair value.

The consolidated financial statements are presented in Kuwaiti Dinars ("KD") which is the functional and presentation currency of the Parent Company and all values are rounded to the nearest thousand (KD '000), except when otherwise indicated.

The Group attributes total comprehensive income or loss of subsidiaries between the owners of the parent and the non-controlling interests based on their respective ownership interests.

3 Statement of compliance

The consolidated financial statements have been prepared in accordance with the regulations for financial services institutions as issued by the Central Bank of Kuwait ("CBK") in the State of Kuwait. These regulations require financial services institutions regulated by CBK to adopt the International Financial Reporting Standards (IFRS Accounting Standards) with the following amendment:

Expected credit loss ("ECL") on credit facilities to be measured at the higher of the ECL computed under IFRS 9 in accordance to the CBK guidelines or the provisions as required by CBK instruction along with its consequent impact on related disclosures.

The above framework is hereinafter referred to as "IFRS accounting standards as adopted by CBK for use by the State of Kuwait".

4 Changes in accounting policies

4.1 New and amended standards adopted by the Group

The following new amendments or standards were effective for the current period.

Standard or Interpretation	Effective for annual periods beginning
IAS 1 Amendments- Disclosure of accounting policies	1 January 2023
IAS 8 Amendments- Definition of accounting estimates	1 January 2023

IAS 1 Amendments – Disclosure of accounting policies

The amendments to IAS 1 require entities to disclose material accounting policies instead of significant accounting policies to assist entities to provide accounting policy disclosures that are more useful. The amendments clarify that accounting policy information may be material because of its nature, even if the related amounts are immaterial.

The adoption of amendments did not have a significant impact on the Group's consolidated financial statements.

IAS 8 Amendments – Definition of accounting estimates

The amendments to IAS 8 inserted the definition of accounting estimates replacing the definition of a change in accounting estimates. Accounting estimates are now defined as monetary amounts in financial statements that are subject to measurement uncertainty.

The adoption of amendments did not have a significant impact on the Group's consolidated financial statements.

4 Changes in accounting policies (continued)

4.2 IASB Standards issued but not yet effective

At the date of authorisation of these consolidated financial statements, certain new standards, amendments and interpretations to existing standards have been published by the IASB but are not yet effective, and have not been adopted early by the Group.

Management anticipates that all of the relevant pronouncements will be adopted in the Group's accounting policies for the first period beginning after the effective date of the pronouncements. Information on new standards, amendments and interpretations that are expected to be relevant to the Group's consolidated financial statements is provided below. Certain other new standards and interpretations have been issued but are not expected to have a material impact on the Group's consolidated financial statements.

Standard or Interpretation	Effective for annual periods beginning
IFRS 10 and IAS 28 Sale or Contribution of Assets between an Investor	
and its Associate or Joint Venture - Amendments	No stated date
IAS 1 Amendments- Classification of liabilities with debt covenants	1 January 2024
IAS 21 Amendments – Lack of exchangeability	1 January 2025
IAS 1 Amendments- Classification of liabilities as current or non-current	1 January 2024

IFRS 10 and IAS 28 Sale or Contribution of Assets between an Investor and its Associate or Joint Venture - Amendments

The Amendments to IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Associates and Joint Ventures (2011) clarify the treatment of the sale or contribution of assets from an investor to its associate or joint venture, as follows:

- require full recognition in the investor's financial statements of gains and losses arising on the sale or contribution of assets that constitute a business (as defined in IFRS 3 Business Combinations)
- require the partial recognition of gains and losses where the assets do not constitute a business, i.e. a gain
 or loss is recognised only to the extent of the unrelated investors' interests in that associate or joint venture.

These requirements apply regardless of the legal form of the transaction, e.g. whether the sale or contribution of assets occurs by an investor transferring shares in a subsidiary that holds the assets (resulting in loss of control of the subsidiary), or by the direct sale of the assets themselves.

IASB has postponed the effective date indefinitely until other projects are completed. However, early implementation is allowed. Management anticipates that the application of these amendments may have an impact on the Group's consolidated financial statements in future should such transactions arise.

IAS 1 Amendments - Classification of liabilities with debt covenants

The amendments to IAS 1 clarify that classification of liabilities as current or non-current depends only on the covenants that an entity is required to comply with on or before the reporting date. In addition, an entity has to disclose information in the notes that enables users of financial statements to understand the risk that non-current liabilities with covenants could become repayable within twelve months.

Management does not anticipate that the adoption of the amendments in the future will have a significant impact on the Group's consolidated financial statements.

4 Changes in accounting policies (continued)

4.2 IASB Standards issued but not yet effective (continued)

IAS 21 Amendments – Lack of exchangeability

The amendments to IAS 21 addresses determination of exchange rate when there is long term lack of exchangeability. The amendments:

- Specify when a currency is exchangeable into another currency and when it is not a currency is exchangeable when an entity is able to exchange that currency for the other currency through markets or exchange mechanisms that create enforceable rights and obligations without undue delay at the measurement date and for a specified purpose; a currency is not exchangeable into the other currency if an entity can only obtain an insignificant amount of the other currency.
- Specify how an entity determines the exchange rate to apply when a currency is not exchangeable when a currency is not exchangeable at the measurement date, an entity estimates the spot exchange rate as the rate that would have applied to an orderly transaction between market participants at the measurement date and that would faithfully reflect the economic conditions prevailing.
- Require the disclosure of additional information when a currency is not exchangeable when a currency
 is not exchangeable an entity discloses information that would enable users of its financial statements to
 evaluate how a currency's lack of exchangeability affects, or is expected to affect, its financial performance,
 financial position and cash flows.

Management does not anticipate that the adoption of the amendments in the future will have a significant impact on the Group's consolidated financial statements.

IAS 1 Amendments - Classification of liabilities as current or non-current

The amendments to IAS 1 clarify the classification of a liability as either current or non-current is based on the entity's rights at the end of the reporting period. Stating management expectations around whether they will defer settlement or not does not impact the classification of the liability. It has added guidance about lending conditions and how these can impact classification and has included requirements for liabilities that can be settled using an entity's own instruments.

Management does not anticipate that the adoption of the amendments in the future will have a significant impact on the Group's consolidated financial statements.

5 Material accounting policies

The material accounting policies adopted in the preparation of the consolidated financial statements are set out below.

5.1 Basis of consolidation

The Group financial statements consolidate those of the Parent Company and all of its subsidiaries. Subsidiaries are all entities (including structured entities) over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group and they are deconsolidated from the date that control ceases. The financial statements of the subsidiaries are prepared for reporting dates which are typically not more than three months from that of the Parent Company, using consistent accounting policies. Adjustments are made for the effect of any significant transactions or events that occur between that date and the reporting date of the Parent Company's financial statements. The details of the significant subsidiaries are set out in note 7 to the consolidated financial statements.

5 Material accounting policies (continued)

5.1 Basis of consolidation (continued)

All transactions and balances between Group companies are eliminated on consolidation, including unrealised gains and losses on transactions between Group companies. Where unrealised losses on intra-group asset sales are reversed on consolidation, the underlying asset is also tested for impairment from a group perspective. Amounts reported in the financial statements of subsidiaries have been adjusted where necessary to ensure consistency with the accounting policies adopted by the Group.

Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Profit or loss and other comprehensive income of subsidiaries acquired or disposed of during the year are recognised from the date the Group gains control, or until the date the Group ceases to control the subsidiary, as applicable.

Non-controlling interests, presented as part of equity, represent the portion of a subsidiary's profit or loss and net assets that is not held by the Group. The Group attributes total comprehensive income or loss of subsidiaries between the owners of the parent and the non-controlling interests based on their respective ownership interests. Losses within a subsidiary are attributed to the non-controlling interests even if that results in a deficit balance.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Group loses control over a subsidiary, it:

- · derecognizes the assets (including goodwill) and liabilities of the subsidiary
- derecognizes the carrying amount of any non-controlling interests
- derecognizes the cumulative translation differences, recorded in equity
- recognizes the fair value of the consideration received
- recognizes the fair value of any investment retained
- recognizes any surplus or deficit in profit or loss
- reclassifies the parent's share of components previously recognized in other comprehensive income
 to profit or loss or retained earnings, as appropriate, as would be required if the Group has directly
 disposed of the related assets or liabilities.

Structured Entities

The Group has created certain Special Purpose Vehicles (SPVs) for the Group's asset management and investment banking activities. SPVs are entities that, by design, either (1) lack sufficient equity to permit the entity to finance its relevent activities without additional financial support from other parties or (2) have equity investors that do not have the ability to make significant decisions relating to the entity's operations through voting rights, or do not have the obligation to absorb the expected losses, or do not have the right to receive the residual returns of the entity.

The primary beneficiary of an SPV (i.e the party that has a controlling financial Interest) is required to consolidated the assets and liabilities of the SPV. The primary beneficiary is the party that has both (1) the power to direct the relevent activities of the SPV that most significantly impact the SPV's economic performance and (2) through its interests in the SPV, the obligation to absorb the losses or the right to receive benefits from the SPV that could potentially be significant to the SPV.

5 Material accounting policies (continued)

5.1 Basis of consolidation (continued)

To assess whether the Group has the power to direct the relevent activities of an SPV that most significantly impact the SPV's economic performance, the Group considers all the facts and circumstances, including its role in establishing the SPV and its ongoing rights and responsibilities. This assessment includes:

- Identifying the relevent activities that most significantly impact the SPV's economic performance; and
- Identifying which party, if any, has power over those relevent activities.

In general, the parties that make the most significant decisions affecting the SPV or have the right to unilaterally remove those decision-makers are deemed to have the power to direct the relevent activities of an SPV.

To assess whether the Group has the obligation to absorb losses of the SPV or the right to receive benefits from the SPV that could potentially be significant to the SPV, the Group considers all of its economic interests, including debt and equity investments, management and incentive fees, derivatives or other arrangements deemed to be variable interests in the SPV. This assessment requires that the Group apply judgement in determining whether those interests, in aggregate, are considered potentially significant to the SPV. Factors considered in assessing significance include: the design of the SPV, including its capitalisation structure; subordination of interests; payment priority; relative share of interests held across various classes withing the SPV's capital structure; and the reasons why the interests are held by the Group.

Certain SPVs are used to raise funds from the Group's clients on the basis of product offering documents with eventual objectives of investments in specified asset classes as defined in the offering documents of the SPVs. These SPVs are managed on a fiduciary basis by the Group's asset management teams and as the Group does not control these SPVs as at the reporting date in accordance with the definition of control in IFRS 10, these SPVs are not consolidated into the Group's consolidated financial statements. The Group's investments in SPV are subject to the terms and conditions of the respective SPV's offering documentation and, are susceptible to market price risk arising from uncertainties about future values of SPV's underlying assets (Note 34.5).

The Group has also created or sponsored certain SPVs primarily to enable its investment banking clients to meet their specific objectives or for allowing clients to hold investments. The Group may provide corporate administration, asset management and advisory services to these SPVs, which involve the Group making decisions on behalf of such entities. The Group administers and manages these entities on behalf of clients who are non-affiliated third parties and are primary economic beneficiaries of the underlying investments. In case of some SPVs, the Group owns voting rights in the SPVs which are protective in nature (i.e not substantive). Accordingly, as the Group does not control these SPVs as at the reporting date in accordance with the definition of control in IFRS 10, these SPVs are not consolidated into the Group's consolidated financial statements. The Group's interest in these SPVs are classified as investment vehicles under accounts receivable and other assets.

5.2 Business combinations

The Group applies the acquisition method in accounting for business combinations. The consideration transferred by the Group to obtain control of a subsidiary is calculated as the sum of the acquisition-date fair values of assets transferred, liabilities incurred and the equity interests issued by the Group, which includes the fair value of any asset or liability arising from a contingent consideration arrangement. Acquisition costs are expensed as incurred. For each business combination, the acquirer measures the non-controlling interests in the acquiree either at fair value or at the proportionate share of the acquiree's identifiable net assets.

If the business combination is achieved in stages, the acquisition date fair value of the acquirer's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date through the consolidated statement of profit or loss.

5 Material accounting policies (continued)

5.2 Business combinations (continued)

The Group recognises identifiable assets acquired and liabilities assumed in a business combination regardless of whether they have been previously recognised in the acquiree's financial statements prior to the acquisition. Assets acquired and liabilities assumed are generally measured at their acquisition-date fair values.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

Goodwill is stated after separate recognition of identifiable intangible assets. It is calculated as the excess of the sum of a) fair value of consideration transferred, b) the recognised amount of any non-controlling interests in the acquiree and c) acquisition-date fair value of any existing equity interest in the acquiree, over the acquisition-date fair values of identifiable net assets. If the fair values of identifiable net assets exceed the sum calculated above, the excess amount (i.e. gain on a bargain purchase) is recognised in the consolidated statement of profit or loss immediately.

5.3 Revenue recognition

Revenue arises from rendering of services, investing activities and real estate activities.

Revenue is measured based on the consideration to which the Group expects to be entitled in a contract with a customer and excludes amounts collected on behalf of third parties. The Group recognises revenue when it transfers control of a product or service to a customer. The Group follows a 5-step process:

- 1 Identifying the contract with a customer
- 2 Identifying the performance obligations
- 3 Determining the transaction price
- 4 Allocating the transaction price to the performance obligations
- 5 Recognising revenue when/as performance obligation(s) are satisfied.

The Group recognises revenue from the following major sources:

5.3.1 Rendering of services

The Group earns fees and commission income from diverse range of asset management, investment banking, custody and brokerage services provided to its customers. Fee income can be divided into the following two categories:

Fee income earned from services that are provided over a certain period of time

Fees earned for the provision of services over a period of time are accrued over that period. These fees include commission income and asset management, custody and other management fees.

Fee income arising from services provided at certain point in time

Fees arising for rendering specific advisory services, brokerage services, equity and debt placement transactions for a third party or arising from negotiating or participating in the negotiation of a transaction for a third party and incentive fees earned are recognised on completion of the underlying transaction.

5.3.2 Interest income

Interest income is reported on an accrual basis using the effective interest method.

5 Material accounting policies (continued)

5.3 Revenue recognition (continued)

5.3.3 Dividend income

Dividend income, other than those from investment in associates, are recognised at the time the right to receive payment is established.

5.3.4 Rental income

Rental income arising from investment properties is accounted for on a straight line basis over the lease term.

5.3.5 Gain from sale of investment properties

Revenue from sale of investment properties is recognised on completion of sale contract.

5.4 Operating expenses

Operating expenses are recognised in consolidated statement of profit or loss upon utilisation of the service or at the date of their origin.

5.5 Borrowing costs

Borrowing costs directly attributable to the acquisition or construction of a qualifying asset are capitalised During the year of time that is necessary to complete and prepare the asset for its intended use or sale. Other borrowing costs are expensed in the period in which they are incurred and reported in finance costs.

5.6 Taxation

5.6.1 Kuwait Foundation for the Advancement of Sciences (KFAS)

The contribution to KFAS is calculated at 1% of taxable profit of the Group attributable to the owner of the Parent Company in accordance with the modified calculation based on the Foundation's Board of Directors' resolution, which states that income from Kuwaiti shareholding associates and subsidiaries and transfer to statutory reserve should be excluded from profit for the year when determining the contribution.

5.6.2 National Labour Support Tax (NLST)

NLST is calculated in accordance with Law No. 19 of 2000 and the Minister of Finance Resolutions No. 24 of 2006 at 2.5% of taxable profit of the Group attributable to the owner of the Parent Company after deducting directors' fees for the year. As per law, income from listed associates and cash dividends from listed companies which are subjected to NLST have to be deducted from the profit for the year.

5.6.3 Zakat

Contribution to Zakat is calculated at 1% of the profit of the Group attributable to the owner of the Parent Company in accordance with the Ministry of Finance Resolution No. 58/2007 effective from 10 December 2007.

Under the NLST and Zakat regulations, no carry forward of losses to the future years or any carry back to prior years is permitted.

5.6.4 Taxation on overseas subsidiaries

Taxation on overseas subsidiaries is calculated on the basis of the tax rates applicable and prescribed according to the prevailing laws, regulations and instructions of the countries where these subsidiaries operate.

5 Material accounting policies (continued)

5.7 Investment in associates

Associate is an entity over which the Group is able to exert significant influence but which is neither subsidiary nor joint ventures. Investment in associate is initially recognised at cost and subsequently accounted for using the equity method. Any goodwill or fair value adjustment attributable to the Group's share in the associate is not recognised separately and is included in the amount recognised as investment in associate.

Under the equity method, the carrying amount of the investment in associate is increased or decreased to recognise the Group's share of the profit or loss and other comprehensive income of the associate, adjusted where necessary to ensure consistency with the accounting policies of the Group.

Unrealised gains and losses on transactions between the Group and its' associate are eliminated to the extent of the Group's interest in the entity. Where unrealised losses are eliminated, the underlying asset is also tested for impairment.

The share of results of an associate is shown on the face of the consolidated statements of profit or loss. This is the profit attributable to equity holders of the associate and therefore is profit after tax and non-controlling interests in the subsidiaries of the associate.

The difference in reporting dates of the associate and the Group is not more than three months. Adjustments are made for the effects of significant transactions or events that occur between that date and the date of the Group's consolidated financial statements. The associate's accounting policies conform to those used by the Group for like transactions and events in similar circumstances.

After application of the equity method, the Group determines whether it is necessary to recognise an additional impairment loss on the Group's investment in its associate. The Group determines at each reporting date whether there is any objective evidence that the investment in the associate is impaired. If this is the case the Group calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value and recognises the amount under a separate heading in the consolidated statement of profit or loss.

Upon loss of significant influence over the associate, the Group measures and recognises any retaining investment at its fair value. Any differences between the carrying amount of the associate upon loss of significant influence and the fair value of the remaining investment and proceeds from disposal are recognised in the consolidated statement of profit or loss.

5.8 Investment in joint ventures

A joint arrangement is a contractual arrangement that gives two or more parties joint control. Joint control is a contractually agreed sharing of control of an arrangement, which exists only when decision about the relevant activities required unanimous consent of parties sharing control. A joint venture is a joint arrangement which by the parties that have the joint control of the arrangement have rights to the net assets of the arrangement. The Group recognises its interests in joint ventures as an investment and accounts for it using the equity method.

5.9 Investment properties

Investment properties are properties held to earn rentals and/or for capital appreciation. Properties under development also include properties that are being constructed or developed for future use as investment properties and are not depreciated.

5 Material accounting policies (continued)

5.9 Investment properties (continued)

Investment properties are initially measured at cost, including transaction costs and where applicable borrowing costs. Subsequent to initial recognition, investment properties are accounted for using the cost model whereby these investment properties are stated at cost less accumulated depreciation and impairment losses, if any. The Group depreciates its investment properties except lands and projects under development on the straight-line method over their expected useful lives of 37 - 50 years.

Investment properties are de-recognised when either they have been disposed of or when the investment properties are permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of an investment property are recognised in the consolidated statement of profit or loss in the year of retirement or disposal.

Transfers are made to or from investment property only when there is a change in use. For a transfer from investment property to owner-occupied property, the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner-occupied property becomes an investment property, the Group accounts for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use.

5.10 Equipment

Vehicles and other equipment are initially recognised at acquisition cost including any costs directly attributable to bringing the assets to the location and condition necessary for it to be capable of operating in the manner intended by the Group's management.

Vehicles and other equipment are subsequently measured using the cost model, cost less subsequent depreciation and impairment losses. Depreciation is recognised on a straight-line basis to write down the cost less estimated residual value of vehicles and other equipment.

The useful life and depreciation method are reviewed periodically to ensure that the method and period of depreciation are consistent with the expected pattern of economic benefits arising from items of equipment.

The following useful lives are applied:

- Office equipment and software: 3 to 5 years
- Vehicles: 3 to 4 years
- Furniture and fixtures: 7 to 10 years
- Decorations: 7 years

Material residual value estimates and estimates of useful life are updated as required, but at least annually.

When assets are sold or retired, their cost and accumulated depreciation are eliminated from the accounts and any gain or loss resulting from their disposal is recognised in the consolidated statement of profit or loss.

5.11 Financial instruments

Financial assets and financial liabilities are recognised in the Group's consolidated financial position when the Group becomes a party to the contractual provisions of the financial instrument.

Financial assets and financial liabilities are measured initially at fair value. On initial recognition, transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

5 Material accounting policies (continued)

5.11 Financial instruments (continued)

5.11.1 Classification and Measurement of Financial assets

To determine their classification and measurement category, IFRS 9 requires all financial assets, except equity instruments and derivatives, to be assessed based on a combination of the entity's business model for managing the assets and the instruments' contractual cash flow characteristics.

Business model assessment

The Group determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective and in order to generate contractual cash flows. The Group's business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios and is based on a number of observable factors such as:

- The stated policies and objectives for the financial assets and the operation of those policies in practice;
- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed;
- The frequency, volume and timing of sales in prior periods, the reasons for such sales and its expectations about future sales activity.

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realised in a way that is different from the Group's original expectations, the Group does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

Assessment of whether contractual cash flows are solely payments of principal and interest (SPPI test)

The Group assesses the contractual terms of financial assets to identify whether they meet the SPPI test. Principal' for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset. Interest is defined as consideration for time value of money and for the credit risk associated with the principal and for other basic lending risks and costs as well as a profit margin. In assessing whether the contractual cash flows are solely payments of principal and interest, the Group considers whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition.

The Group classifies its financial assets upon initial recognition into the following categories:

- Financial assets carried at amortised cost
- Financial assets carried at fair value through profit or loss (FVTPL)
- Financial assets carried at fair value through other comprehensive income (FVOCI)

Financial assets carried at Amortised cost:

A financial asset is carried at amortised cost if it meets both of the following conditions:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise, on specified dates, to cash flows that are solely payments of principal and interest on the principal amount outstanding.

5 Material accounting policies (continued)

5.11 Financial instruments (continued)

5.11.1 Classification and Measurement of Financial assets (continued)

Financial assets carried at Amortised cost: (continued)

Financial assets carried at amortised cost are subsequently measured at amortised cost using the effective interest method. Interest income, foreign exchange gains and losses and impairment are recognised in the consolidated statement of profit or loss. Any gain or loss on derecognition is recognised in the consolidated statement of profit or loss.

The Group's financial assets at amortised cost comprise of the followings:

Loans and advances

Loans and advances are financial assets originated by the Group by providing money directly to the borrower that have fixed or determinable payments and are not quoted in an active market.

• Accounts receivable and other assets

Receivables are stated at original invoice amount less allowance for any impairment.

Debt instruments

Debt instruments classified at amortized cost represents loans given.

• Cash and cash equivalents

Cash and cash equivalents comprise cash and bank balances, together with time deposits that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value.

Financial asset carried at FVTPL:

Financial assets in this category are those assets which have been either designated by management upon initial recognition or are mandatorily required to be measured at fair value under IFRS 9. Management designates an instrument at FVTPL that otherwise meet the requirements to be measured at amortised cost or at FVOCI only if it eliminates, or significantly reduces, an accounting mismatch that would otherwise arise. Financial assets with contractual cash flows not representing solely payment of principal and interest are mandatorily required to be measured at FVTPL.

Financial assets at FVTPL are subsequently measured at fair value. Changes in fair value are recognised in the consolidated statement of profit or loss. Interest income is recognised using the effective interest method. Dividend income from equity investments measured at FVTPL is recognised in the consolidated statement of profit or loss when the rights to receive cash flows has been established.

Equity instruments at FVOCI:

Upon initial recognition, the Group may elect to classify irrevocably some of its equity investments as equity instruments at FVOCI when they meet the definition of Equity under IAS 32 Financial Instruments: Presentation and are not held for trading. Such classification is determined on an instrument-by- instrument basis.

Gains and losses on subsequent measurement of these equity instruments are never recycled to consolidated statement of profit or loss. Dividends are recognised in consolidated statement of profit or loss when the rights to receive cash flows has been established, except when the Group benefits from such proceeds as a recovery of part of the cost of the instrument, in which case, such gains are recorded in other comprehensive income. Equity instruments at FVOCI are not subject to an impairment assessment. Upon derecognition cumulative change in fair value are reclassified from fair value reserve to retained earnings in the consolidated statement of changes in equity.

5 Material accounting policies (continued)

5.11 Financial instruments (continued)

5.11.1 Classification and Measurement of Financial assets (continued)

Debt instruments at FVOCI:

The Group measure debt instruments at FVOCI when both of the following conditions are met:

- The instrument is held within a business model, the objective of which is achieved by both collecting contractual cash flows and selling financial assets
- The contractual terms of the financial asset meet the SPPI test

Debt instruments at FVOCI are subsequently measured at fair value and gains and losses arising due to changes in fair value are recognised in other comprehensive income. Interest income and foreign exchange gains or losses are recognised in the consolidated statement of profit or loss. On derecognition, cumulative gains or losses previously recognised in other comprehensive income is reclassified from equity to the consolidated statement of profit or loss. The management of the Group classifies certain unquoted debt instruments under debt instruments at FVOCI.

Foreign exchange gains and losses on financial assets:

The carrying amount of financial assets that are denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of each reporting period. Specifically;

- for financial assets measured at amortised cost that are not part of a designated hedging relationship, exchange differences are recognised in profit or loss;
- for debt instruments measured at FVOCI that are not part of a designated hedging relationship, exchange differences on the amortised cost of the debt instrument are recognised in profit or loss. Other exchange differences are recognised in other comprehensive income in the fair value reserve;
- for financial assets measured at FVTPL that are not part of a designated hedging relationship, exchange differences are recognised in profit or loss; and
- for equity instruments measured at FVOCI, exchange differences are recognised in other comprehensive income in the fair value reserve.

Impairment of Financial Assets:

The Group computes Expected Credit Losses (ECL) on the following financial instruments that are not measured at fair value through profit or loss:

- Loans to customers
- Bank balances and time deposits
- Accounts receivables and other financial assets

Equity investments are not subject to Expected Credit Losses.

Impairment of loans to customers:

5 Material accounting policies (continued)

5.11 Financial instruments (continued)

5.11.1 Classification and Measurement of Financial assets (continued)

Impairment of Financial Assets: (continued)

Loans to customers granted by the Group consists of commercial loans and staff loans. Impairment on loans to customers shall be recognised in the consolidated statement of financial position at an amount equal to the higher of ECL under IFRS 9 according to the CBK guidelines, and the provisions required by the CBK instructions.

Impairment of financial assets other than loans to customers:

The Group recognises ECL on balances and deposits with banks and accounts receivables.

Expected Credit Losses

The Group applies three-stage approach to measuring expected credit losses (ECL) as follows:

Stage 1: 12 months ECL

The Group measures loss allowances at an amount equal to 12-month ECL on financial assets where there have not been significant increase in credit risk since their initial recognition or on exposures that are determined to have a low credit risk at the reporting date. The Group considers a financial asset to have low credit risk when its credit risk rating is equivalent to the globally understood definition of 'investment grade'.

Stage 2: Lifetime ECL - not credit impaired

The Group measures loss allowances at an amount equal to lifetime ECL on financial assets where there have been a significant increase in credit risk since initial recognition but are not credit impaired.

Stage 3: Lifetime ECL – credit impaired

The Group measures loss allowances at an amount equal to lifetime ECL on financial assets that are determined to be credit impaired based on objective evidence of impairment.

Life time ECL is ECL that result from all possible default events over the expected life of a financial instrument. The 12-month ECL is the portion of life time expected credit loss that result from default events that are possible within the 12 months after the reporting date. Both life time ECLs and 12 month ECLs are calculated on either an individual basis or a collective basis depending on the nature of the underlying portfolio of financial instruments.

Determining the stage of impairment

At each reporting date, the Group assesses whether a financial asset or group of financial assets is credit impaired. The Group considers a financial asset to be credit impaired when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred or when contractual payments are 90 days past due.

At each reporting date, the Group also assesses whether there have been significant increase in credit risk since initial recognition by comparing the risk of default occurring over the remaining expected life from the reporting date with the risk of default at the date of initial recognition. The quantitative criteria used to determine a significant increase in credit risk is a series of relative and absolute thresholds. All financial assets that are 30 days past due are deemed to have significant increase in credit risk since initial recognition and migrated to stage 2 even if other criteria do not indicate a significant increase in credit risk.

5 Material accounting policies (continued)

5.11 Financial instruments (continued)

5.11.1 Classification and Measurement of Financial assets (continued)

Measurement of ECLs

ECLs are probability weighted estimates of credit losses and are measured as the present value of all cash shortfalls discounted at the effective interest rate of the financial instrument. Cash shortfall represent the difference between cash flows due to the Group in accordance with the contract and the cash flows that the Group expects to receive. The key elements in the measurement of ECL include probability of default (PD), loss given default (LGD) and exposure at default (EAD).

The Group estimates these elements using appropriate credit risk models taking into consideration the internal and external credit ratings of the assets, nature and value of collaterals, forward looking macro-economic scenarios etc.

The Group has applied simplified approach to impairment for trade and other receivables (represented by management fees and other dues from clients) as permitted under the standard. The Group has established a provision matrix that is based on the Group's historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

Provision for credit losses in accordance with CBK instructions

The Group is required to calculate provisions for credit losses on credit facilities (loans to customers) in accordance with the instructions of CBK on the classification of credit facilities and calculation of provisions. Credit facilities are classified as past due when a payment has not been received on its contractual payment date or if the facility is in excess of pre-approved limits.

A credit facility is classified as a bad loan (non-performing loan) when the interest or a principal instalment is past due more than 90 days, unless the Group has reasonable and supportable information to demonstrate that a more lagging default criterion is more appropriate. In addition to specific provisions, Expected Credit Loss ("ECL") to be measured at the higher of the ECL on credit facilities computed under IFRS 9 according to the CBK guidelines or the provisions as required by CBK instruction which is minimum general provisions of 1% on cash facilities and 0.5% on non-cash facilities are made on all applicable credit facilities (net of certain restricted categories of collateral) which are not subject to specific provisioning. Past due and past due and impaired loans are managed and monitored as irregular facilities.

5.11.2 Classification and Measurement of Financial Liabilities

The Group's financial liabilities include borrowings, accounts payable and other liabilities, bonds and derivatives financial instruments.

The subsequent measurement of financial liabilities depends on their classification as follows:

Financial liabilities at amortised cost

Financial liabilities that are not (i) contingent consideration of an acquirer in a business combination, (ii) held for trading, or (iii) designated at FVTPL, are measured subsequently at amortised cost using the effective interest method. Accounts payable and other liabilities, borrowings and bonds issued are classified as financial liabilities measured subsequently at amortised cost.

Accounts payable and other liabilities

Liabilities are recognised for amounts to be paid in the future for goods or services received, whether billed by the supplier or not.

5 Material accounting policies (continued)

- 5.11 Financial instruments (continued)
- 5.11.2 Classification and Measurement of Financial Liabilities (continued)
- Financial liabilities at amortised cost: (continued)

Borrowings:

Murabaha facilities

Murabaha facilities represent amount payable on deferred settlement basis for assets purchases under murabaha arrangements. Murabaha facilities are stated at the contractual amount payable, less deferred profit payable.

Profit payable is expensed on a time apportionment basis taking account of the profit rate attributable and the balance outstanding.

All other borrowings are subsequently measured at amortised cost using the effective interest rate method. Gains and losses are recognised in the consolidated statement of profit or loss when the liabilities are derecognised as well as through the effective interest rate method (EIR) amortisation process.

Bonds

Bonds are carried on the consolidated statement of financial position at their principal amount, net of directly related costs of issuing the bonds to the extent that such costs have not been amortised. These costs are amortised through the consolidated statement of profit or loss over the life of the bonds using the effective interest rate method.

Foreign exchange gains and losses on financial liabilities:

For financial liabilities that are denominated in a foreign currency and are measured at amortised cost at the end of each reporting period, the foreign exchange gains and losses are determined based on the amortised cost of the instruments. These foreign exchange gains and losses are recognised in profit or loss, for financial liabilities that are not part of a designated hedging relationship. For those which are designated as a hedging instrument for a hedge of foreign currency risk foreign exchange gains and losses are recognised in other comprehensive income and accumulated in a separate component of equity.

Derecognition of financial assets and financial liabilities:

The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

Derivative financial instruments and hedge accounting:

Derivatives are recognised initially at fair value at the date a derivative contract is entered into and are subsequently remeasured to their fair value at each reporting date. The resulting gain or loss is recognised in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship.

5 Material accounting policies (continued)

5.11 Financial instruments (continued)

5.11.2 Classification and Measurement of Financial Liabilities (continued)

Derivative financial instruments and hedge accounting: (continued)

A derivative with a positive fair value is recognised as a financial asset whereas a derivative with a negative fair value is recognised as a financial liability. Derivatives are not offset in the consolidated financial statements unless the Group has both legal right and intention to offset.

All derivative financial instruments used for hedge accounting are recognised initially at fair value and reported subsequently at fair value in the consolidated statement of financial position. To the extent that the hedge is effective, changes in the fair value of derivatives designated as hedging instruments in cash flow hedges are recognised in other comprehensive income and included within the cash flow hedge reserve in equity. Any ineffectiveness in the hedge relationship is recognised immediately in consolidated statement of profit or loss.

At the time the hedged item affects consolidated statement of profit or loss, any gain or loss previously recognised in other comprehensive income is reclassified from equity to consolidated statement of profit or loss and presented as a reclassification adjustment within other comprehensive income. However, if a non-financial asset or liability is recognised as a result of the hedged transaction, the gains and losses previously recognised in other comprehensive income are included in the initial measurement of the hedged item.

All derivative financial instruments are recognised in the consolidated statement of financial position as either assets (positive fair values) or liabilities (negative fair values).

Derivative financial instruments used by the Group include foreign exchange forwards contracts.

Note 35.2 sets out details of the fair values of the derivative instruments.

• Financial liabilities at fair value through profit or loss

Financial liabilities are classified as at fair value through profit or loss (FVTPL) when the financial liability is held for trading or it is designated as at FVTPL.

Financial liabilities at FVTPL are measured at fair value, with any gains or losses arising on changes in fair value recognised in profit or loss to the extent that they are not part of a designated hedging relationship. The transaction cost is recognised in profit or loss.

The Group classifies short sale liabilities as financial liabilities at FVTPL as these are held for trading purpose. Short sale liabilities arise when borrowed securities are sold in an anticipation of a decline in the market value of that securities.

5.12 Trade and settlement date accounting

All 'regular way' purchases and sales of financial assets are recognised on the trade date i.e. the date that the entity commits to purchase or sell the asset. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame generally established by regulation or convention in the market place.

5.13 Amortised cost of financial instruments

This is computed using the effective interest method less any allowance for impairment. The calculation takes into account any premium or discount on acquisition and includes transaction costs and fees that are an integral part of the effective interest rate.

5 Material accounting policies (continued)

5.14 Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the consolidated statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

5.15 Fair value of financial instruments

The fair value of financial instruments that are traded in active markets at each reporting date is determined by reference to quoted market prices or dealer price quotations (bid price for long positions and ask price for short positions), without any deduction for transaction costs.

For financial instruments not traded in an active market, the fair value is determined using appropriate valuation techniques. Such techniques may include using recent arm's length market transactions; reference to the current fair value of another instrument that is substantially the same; a discounted cash flow analysis or other valuation models.

An analysis of fair values of financial instruments and further details as to how they are measured are provided in note 35.

5.16 Impairment testing of non-financial assets

An impairment loss is recognised for the amount by which the asset's or cash-generating unit's carrying amount exceeds its recoverable amount, which is the higher of fair value less costs to sell and value-in-use. To determine the value-in-use, management estimates expected future cash flows from each cash-generating unit and determines a suitable interest rate in order to calculate the present value of those cash flows. The data used for impairment testing procedures are directly linked to the Group's latest approved budget, adjusted as necessary to exclude the effects of future reorganisations and asset enhancements. Discount factors are determined individually for each cash-generating unit and reflect management's assessment of respective risk profiles, such as market and asset-specific risks factors.

Impairment losses for cash-generating units reduce first the carrying amount of any goodwill allocated to that cash-generating unit. Any remaining impairment loss is charged pro rata to the other assets in the cash-generating unit. With the exception of goodwill, all assets are subsequently reassessed for indications that an impairment loss previously recognised may no longer exist. An impairment charge is reversed if the cash-generating unit's recoverable amount exceeds its carrying amount.

5.17 Equity, reserves and dividend payments

Share capital represents the nominal value of shares that have been issued and paid up.

Share premium includes any premiums received on issue of share capital. Any transaction costs associated with the issuing of shares are deducted from share premium.

Statutory and voluntary reserves comprise appropriations of current and prior period profits in accordance with the requirements of the companies' law and the Parent Company's articles of association.

Other components of equity include the following:

• foreign currency translation reserve – comprises foreign currency translation differences arising from the translation of financial statements of the Group's foreign entities into Kuwait Dinars.

Retained earnings include all current and prior period retained profits. All transactions with owners of the Parent Company are recorded separately within equity.

Dividend distributions payable to equity shareholders are included in accounts payable and other liabilities when the dividends have been approved in a meeting of the general assembly.

5 Material accounting policies (continued)

5.18 Treasury shares

Treasury shares consist of the Parent Company's own issued shares that have been reacquired by the Group. The treasury shares are accounted for using the cost method. Under this method, the weighted average cost of the shares reacquired is charged to a contra account in equity.

When the treasury shares are reissued, gains are credited to a separate account in equity, (the "treasury shares reserve"), which is not distributable. Any realised losses are charged to the same account to the extent of the credit balance on that account. Any excess losses are charged to retained earnings then to the voluntary reserve and statutory reserve. No cash dividends are paid on these shares. The issue of stock dividend shares increases the number of treasury shares proportionately and reduces the average cost per share without affecting the total cost of treasury shares.

5.19 Provisions, contingent assets and contingent liabilities

Provisions are recognised when the Group has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of economic resources will be required from the Group and amounts can be estimated reliably. Timing or amount of the outflow may still be uncertain.

Provisions are measured at the estimated expenditure required to settle the present obligation, based on the most reliable evidence available at the reporting date, including the risks and uncertainties associated with the present obligation. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. Provisions are discounted to their present values, where the time value of money is material.

Contingent assets are not recognised in the consolidated financial statements, but are disclosed when an inflow of economic benefits is probable.

Contingent liabilities are not recognised in the consolidated statement of financial position, but are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote.

5.20 Foreign currency translation

5.20.1 Foreign currency transactions

Foreign currency transactions are translated into the functional currency of the respective Group entity, using the exchange rates prevailing at the dates of the transactions (spot exchange rate). Foreign exchange gains and losses resulting from the settlement of such transactions and from the remeasurement of monetary items denominated in foreign currency at year-end exchange rates are recognised in the consolidated statement of profit or loss. Non-monetary items are not retranslated at year-end and are measured at historical cost (translated using the exchange rates at the transaction date), except for non-monetary items measured at fair value which are translated using the exchange rates at the date when fair value was determined.

5.20.2 Foreign operations

In the Group's consolidated financial statements, all assets, liabilities and transactions of Group entities with a functional currency other than the KD are translated into KD upon consolidation. The functional currency of the entities in the Group has remained unchanged during the reporting period.

5 Material accounting policies (continued)

5.20 Foreign currency translation (continued)

5.20.2 Foreign operations (continued)

On consolidation, assets and liabilities have been translated into KD at the closing rate at the reporting date. Goodwill and fair value adjustments arising on the acquisition of a foreign entity have been treated as assets and liabilities of the foreign entity and translated into KD at the closing rate. Income and expenses have been translated into KD at the average rate over the reporting period. Exchange differences are charged/credited to other comprehensive income and recognised in the foreign currency translation reserve in equity. On disposal of a foreign operation, the related cumulative translation differences recognised in equity are reclassified to the consolidated statement of profit or loss and are recognised as part of the gain or loss on disposal.

5.21 End of service indemnity

The Group provides end of service benefits to its employees. The entitlement to these benefits is based upon the employees' final salary and length of service, subject to the completion of a minimum service period in accordance with relevant labour law and the employees' contracts. The expected costs of these benefits are accrued over the period of employment. This liability, which is unfunded, represents the amount payable to each employee as a result of termination on the reporting date.

In addition to the end of service benefits with respect to its Kuwaiti national employees, the Group also makes contributions to the Public Institution for Social Security calculated as a percentage of the employees' salaries. The Group's obligations are limited to these contributions, which are expensed when due.

5.22 Fiduciary assets

Assets and related deposits held in trust or in a fiduciary capacity are not treated as assets or liabilities of the Group and accordingly are not included in these consolidated financial statements.

5.23 Segment reporting

The Group has three operating segments: the asset management, investment banking and others. In identifying these operating segments, management generally follows the Group's service lines representing its main services. Each of these operating segments is managed separately as each requires different approaches and other resources.

For management purposes, the Group uses the same measurement policies as those used in its financial statements. In addition, assets or liabilities which are not directly attributable to the business activities of any operating segment are not allocated to a segment.

5.24 Leased assets

The Group as a lessee

For any new contracts entered into on or after 1 January 2023, the Group considers whether a contract is, or contains a lease. A lease is defined as 'a contract, or part of a contract, that conveys the right to use an asset (the underlying asset) for a period of time in exchange for consideration'.

5 Material accounting policies (continued)

5.24 Leased assets (continued)

The Group as a lessee (continued)

To apply this definition the Group assesses whether the contract meets three key evaluations which are whether:

- the contract contains an identified asset, which is either explicitly identified in the contract or implicitly specified by being identified at the time the asset is made available to the Group
- the Group has the right to obtain substantially all of the economic benefits from use of the identified asset throughout the period of use, considering its rights within the defined scope of the contract
- the Group has the right to direct the use of the identified asset throughout the period of use. The Group assess whether it has the right to direct 'how and for what purpose' the asset is used throughout the period of use.

The Group has elected to account for short-term leases and leases of low-value assets using the practical expedients. Instead of recognising a right-of-use asset and lease liability, the payments in relation to these are recognised as an expense in profit or loss on a straight-line basis over the lease term.

Measurement and recognition of leases as a lessee

At lease commencement date, the Group recognises a right-of-use asset and a lease liability on the balance sheet measured as follows:

Right-of-use asset

The right-of-use asset is measured at cost, which is made up of the initial measurement of the lease liability, any initial direct costs incurred by the Group, an estimate of any costs to dismantle and remove the asset at the end of the lease, and any lease payments made in advance of the lease commencement date (net of any incentives received).

Subsequent to initial measurement, the Group depreciates the right-of-use assets on a straight-line basis from the lease commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The Group also assesses the right-of-use asset for impairment when such indicators exist.

Lease liability

At the commencement date, the Group measures the lease liability at the present value of the lease payments unpaid at that date, discounted using the interest rate implicit in the lease if that rate is readily available or the Group's incremental borrowing rate.

Lease payments included in the measurement of the lease liability are made up of fixed payments (including in substance fixed), variable payments based on an index or rate, amounts expected to be payable under a residual value guarantee and payments arising from options reasonably certain to be exercised.

Subsequent to initial measurement, the liability is reduced for payments made and increased for interest. It is remeasured to reflect any reassessment or modification, or if there are changes in in-substance fixed payments. When the lease liability is remeasured, the corresponding adjustment is reflected in the right-of-use asset, or profit and loss if the right-of-use asset is already reduced to zero.

5 Material accounting policies (continued)

5.25 Climate-related matters

The Group considers climate-related matters in estimates and assumptions, where appropriate. Risks induced by climate changes include transition risks (eg regulatory changes and reputational risks) and physical risks due to weather related events (e.g. storms, wildfires, rising sea levels). The Group has not identified significant risks induced by climate changes that could negatively and materially affect the Group's consolidated financial statements. Management continuously assesses the impact of climate-related matters.

The Group's consolidated financial statements integrate climate-related matters in various items. These include the Group's assessing the useful life of property, plant and equipment, fair valuation of investment properties and contingent liabilities.

Assumptions could change in the future in response to new environmental regulations, commitments taken and changing consumer demand. These changes, if not anticipated, could have an impact on the Group's future cash flows, financial performance and financial position.

6 Significant management judgements and estimation uncertainty

The preparation of the Group's consolidated financial statements requires management to make judgments, estimations and assumptions that affect the reported amount of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. However, uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in future periods.

6.1 Significant management judgments

In the process of applying the Group's accounting policies, management has made the following significant judgments, which have the most significant effect on the amounts recognised in the consolidated financial statements:

6.1.1 Business model assessment

The Group classifies financial assets after performing the business model test (please see accounting policy for financial instruments sections in note 5.11). This test includes judgement reflecting all relevant evidence including how the performance of the assets is evaluated and their performance measured and the risks that affect the performance of the assets. Monitoring is part of the Group's continuous assessment of whether the business model for which the remaining financial assets are held continues to be appropriate and if it is not appropriate whether there has been a change in business model and so a prospective change to the classification of those assets.

6.1.2 Classification of real estate

Management decides on acquisition of a real estate whether it should be classified as trading, property held for development or investment property.

The Group classifies properties under development as Investment properties if it acquired with the intention of holding it to earn rental income or capital appreciation upon completion of the development.

The Group classifies property as investment property if it is acquired to generate rental income or for capital appreciation, or for undetermined future use.

6 Significant management judgements and estimation uncertainty (continued)

6.1 Significant management judgments (continued)

6.1.3 Control assessment

When determining control, management considers whether the Group has the practical ability to direct the relevant activities of an investee on its own to generate returns for itself. The assessment of relevant activities and ability to use its power to affect variable return requires considerable judgement.

6.1.4 Structured entities

The Group uses judgement in determining which entities are structured entities. If the voting or similar rights are not the dominant factor in deciding who controls the entity and such voting rights relate to the administrative tasks only and the relevant activities are directed by means of contractual arrangements, the Group identifies such entities as structured entities. After determining whether an entity is a structured entity, the Group determines whether it needs to consolidate this entity based on the consolidation principles of IFRS 10.

Managed Funds

The Group sponsors certain asset management funds as fund manager. Where the non-affiliated members of the fund have the ability to remove the Group as fund manager without cause (i.e. kick-out rights), based on simple majority vote, or the non-affiliated members have rights to participate in important decisions, the Group does not consolidate such funds. In limited cases, where the non-affiliated members do not have substantive kick-out or participation rights, the Group consolidates the funds if the Group as a fund manager has both power and a potentially significant interest.

The Group's asset management funds have investments in both publicly held and privately held entities. These investments are accounted for under "investment company" guidelines and accordingly, irrespective of the percentage of equity ownership interests held, are carried on the Consolidated Statement of Financial Position at fair value. If consolidated, the Group retains the accounting under such specialised "investment company" guidelines.

6.2 Estimates uncertainty

Information about estimates and assumptions that have the most significant effect on recognition and measurement of assets, liabilities, income and expenses is provided below. Actual results may be substantially different.

6.2.1 Impairment of associate and joint venture

After application of the equity method, the Group determines whether it is necessary to recognise any impairment loss on the Group's investment in its associated company and joint venture, at each reporting date based on existence of any objective evidence that the investment in the associate and joint venture is impaired. If this is the case the Group calculates the amount of impairment as the difference between the recoverable amount of the associate and joint venture and its carrying value and recognises the amount in the consolidated statement of profit or loss.

6 Significant management judgements and estimation uncertainty (continued)

6.2 Estimates uncertainty (continued)

6.2.2 Impairment of financial assets

Measurement of estimated credit losses involves estimates of loss given default and probability of default. Loss given default is an estimate of the loss arising in case of default by customer. Probability of default is an estimate of the likelihood of default in the future. The Group based these estimates using reasonable and supportable forward looking information, which is based on assumptions for the future movement of different economic drivers and how these drivers will affect each other.

6.2.3 Provision for credit losses

The Group reviews its loans to customers on a regular basis to assess whether a provision for credit losses should be recorded in the consolidated statement of profit or loss. In particular, considerable judgement by management is required in the estimation of the amount and timing of future cash flows when determining the level of provisions required. Such estimates are necessary based on assumptions about several factors involving varying degrees of judgement and uncertainty, and actual results may differ resulting in future changes to such provisions.

6.2.4 Impairment of investment properties

The Group reviews the carrying amounts of its investment properties to determine whether there is any indication that those assets have suffered an impairment loss or indication that an impairment loss previously recognised may no longer exist in accordance with accounting policies stated in note 5.9 & note 5.16. The recoverable amount of an asset is determined based on higher of fair value and value in use.

6.2.5 Depreciation of investment properties and equipment

The Group's management determines the useful lives and related depreciation charges. The depreciation charge for the year will change significantly if actual life is different from the estimated useful life of the asset.

6.2.6 Fair value of financial instruments

Management apply valuation techniques to determine the fair value of financial instruments where active market quotes are not available. This requires management to develop estimates and assumptions based on market inputs, using observable data that market participants would use in pricing the instrument. Where such data is not observable, management uses its best estimate. Estimated fair values of financial instruments may vary from the actual prices that would be achieved in an arm's length transaction at the reporting date (note 35).

7 Subsidiary companies

7.1 Details of the Group's consolidated subsidiaries at the end of the reporting period are as follows:

Name of the subsidiary	Country of incorporation	Ownership pe	ercentage	Principal activity
		31 Dec. 2023 %	31 Dec. 2022 %	
Mar-Gulf Management Company Inc.	USA	100.00	100.00	Assets management

MKZ Development 29	Cayman Islands	100.00	100.00	Real Estate
MKZ Development 32	Cayman Islands	100.00	100.00	Real Estate

7.1.1 The ownership of Markaz Arabian Fund increased by 0.62% (31 December 2022: decreased by 1.43%) and Markaz Fixed Income Fund increased by 15.79% (31 December 2022: decreased by 1.21%) due to changes in units owned by non-controlling interests holders as a result of subscription and redemption of the funds' units. These changes in the ownership resulted in a net gain of KD361 thousand (31 December 2022: net gain of KD487 thousand) which has been included in the consolidated statement of changes in equity.

7.1.2 Consolidation of a subsidiary

During the year, the Group incorporated an investment fund (GCC Momentum Fund) and consolidated financial statements of this fund in the consolidated financial statements of the Group as of 31 December 2023.

At 31 December 2022, the Group decided to consolidate certain special purpose structured real estate entities and investment funds (Markaz Development 8, 15, 25, 29 and 32 – refer note 7) which were previously recognised as financial assets at FVTPL, as management belived that the Group had control over these entities.

7 Subsidiary companies (continued)

7.1 Details of the Group's consolidated subsidiaries at the end of the reporting period are as follows: (continued)

7.1.2 Consolidation of a subsidiary (continued)

Summarised cumulative financial information of the above newly consolidated subsidiaries (during the previous year) are as follows:

Goodwill/(bargain purchase) on consolidation of subsidiaries	-
Total identifiable net assets	13,391
Accounts payables and other liabilities	(676)
Accounts receivables and other assets	227
Investment in associate (NW1 IOS GP Fund) (Note 19)	2,376
Investment properties	8,500
Cash and cash equivalents	2,964
Less: recognized amounts of identifiable assets consolidated and liabilities assumed	
	13,391
Value of non-controlling interests	1,351
Fair value of the existing investments (Note 17)	12,040
	KD'000

For the purpose of the consolidated statement of cash flows, the net cash inflow on acquisition of these subsidiaries is KD2,964 thousand. No impact to the consolidated statement of profit or loss for the previous year from the above newly consolidated subsidiaries since it's consolidated as of 31 December 2022.

The initial accounting for the business combination was completed during the previous year based on consolidation date fair values of the assets consolidated and the liabilities assumed.

7.1.3 De-recognition of a fund subsidiary

During the year, the Group de-recognised a fund subsidiary, Markaz Gulf Real Estate Fund, due to loss of control and reclassified as investment in associates as of 30 June 2023.

Summarised financial information of the derecognized subsidiary is as follows:

	KD'000
Fair value of residual interest	7,194
Less:	
Total identifiable net assets derecognized*	6,137
Deemed gain on derecognition of subsidiary	1,057

The initial fair value of the residual interest recognized as investment in associates is equivalent to the fair value of the identifiable net assets on the date that the control is lost.

^{*}This include assets, liabilities and NCI amounting to KD17,526 thousand, KD811 thousand and KD10,578 thousand respectively.

7 Subsidiary companies (continued)

7.2 Subsidiaries with material non-controlling interests

The Group includes three subsidiaries, with material non-controlling interests (NCI):

Name	Proport ownership and votin held by t	interests g rights		/(loss)	Accumula	ated NCI
	31 Dec. 2023 %	31 Dec. 2022 %	31 Dec. 2023 KD '000	31 Dec. 2022 KD '000	31 Dec. 2023 KD '000	31 Dec. 2022 KD '000

8 Interest income

	Year ended 31 Dec. 2023 KD '000	Year ended 31 Dec. 2022 KD '000
On financial assets at amortised cost:		
- Time deposits	136	50
- Loans to customers	175	21
- Financial assets at amortised cost	299	150
On financial assets at fair value through profit or loss	397	240
	1,007	461

9 Management fees and commission income

Management fees and commission income relate to income arising from the Group's management of portfolios, funds, custody and similar trust, fiduciary activities and advisory services.

10 (Loss)/gain from financial assets at fair value through profit or loss

	Year ended 31 Dec. 2023 KD '000	Year ended 31 Dec. 2022 KD '000
Change in fair value of financial assets at fair value through profit or loss Gain on sale of financial assets at fair value through profit or loss	(747) 117	167 560
	(630)	727

11 General and administrative expenses

Staff costs	2023 KD '000 6,908	2022 KD '000 6,276
Depreciation and amortisation Other expenses	1,437 4,510	1,806 3,251

12 Finance costs

On financial liabilities at amortised cost: - Bonds issued	1,794	1,701
 Bank borrowings Lease Liabilities 	1,639 88	1,051 64
	3,521	2,816

13 Basic and diluted earnings per share attributable to the owners of the Parent Company

Basic and diluted earnings per share attributable to the owners of the Parent Company is calculated by dividing the profit for the year attributable to the owners of the Parent Company by the weighted average number of shares outstanding and in issue during the year (excluding treasury shares).

	Year ended 31 Dec. 2023	Year ended 31 Dec. 2022
Profit for the year attributable to the owners of the Parent Company		
(KD '000)	4,147	2,861
Weighted average number of shares outstanding and in issue during		
the year (excluding treasury shares)	500,953,403	501,926,828
Basic and diluted earnings per share attributable to the owners of the		
Parent Company	8 Fils	6 Fils

14 Cash and cash equivalents

Cash and cash equivalents included in the consolidated statement of cash flows comprise of the following accounts:

	31 Dec. 2023 KD '000	31 Dec. 2022 KD '000
Cash and bank balances Time deposits	6,639 272	15,112 2,104
Less: Time deposits maturing after three months	6,911 (64)	17,216 (77)
Cash and cash equivalent for the purpose of consolidated statement of cash flows	6,847	17,139

The Group's time deposits carry interest and profit rates for KD deposits between 1.50% to 4.00% and FCY deposits between 3.75% to 7.20% (31 December 2022: 0.65% to 6.5%) per annum.

The total unsecured overdraft facilities available to the Group from local commercial banks which carries interest rate at 2% to 2.25% above Central Bank of Kuwait discount rate were KD3,000 thousand (31 December 2022: KD5,000 thousand) and no amount has been availed from these facilities as at 31 December 2023 (31 December 2022:Nil).

15 Accounts receivable and other assets

	31 Dec. 2023 KD '000	31 Dec. 2022 KD '000
Management fees and commission receivable	2,659	2,604
Prepayments and advances	590	818
Interest receivable	754	236
Investment Vehicles*	45	45
Other receivables	1,972	2,433
	6,020	6,136

^{*}This represents amount invested by the Group in the share capital of certain SPVs.

15 Accounts receivable and other assets (continued)

The average credit period on management fees and commission receivable is 30-90 days. No interest is charged on outstanding receivables. Receivables are written off (i.e. derecognised) when there is no reasonable expectation of recovery.

Management fees and commission receivable comprise of:

*	31 Dec. 2023 KD '000	31 Dec. 2022 KD '000
Neither past due nor impaired Past due but not impaired	2,087 572	2,073 531
	2,659	2,604
Aging of past due but not impaired balances:	31 Dec. 2023 KD '000	31 Dec. 2022 KD '000
0 to 90 days 90 to 180 days Above 180 days	418 53 101	273 31 227
	572	531

The Group has determined that the ECL allowance for management fees and commission receivable from clients and other receivables that are financial assets is not material.

16 Loans to customers

	31 Dec. 2023 KD '000	31 Dec. 2022 KD '000
Commercial loans Personal loans	2,000 591	2,000 1,221
Specific provision for credit losses General provision for credit losses	2,591 - (26)	3,221 (485) (27)
	2,565	2,709

The interest rate on commercial and personal loans ranged from 1.50% to 8.25% (31 December 2022: 1.50% to 10.00%) per annum. All loans are denominated in KD as at 31 December 2023.

The maturity profile of loans to customers is as follows:

, , , ,	31 Dec. 2023 KD '000	31 Dec. 2022 KD '000
Between one month and six months	12	3
Between six months and one year	16	5
Over one year	2,563	2,728
Non-performing loans	-	485
	2,591	3,221

16 Loans to customers (continued)

Provision for credit losses is made in accordance with Central Bank of Kuwait requirements. Loans to customers amount of KD2,000 thousand is performing and secured loan against customer portfolio in favor of the Parent Company. The remaining loans to customers of KD591 thousand are performing and are to staff where their indemnity balances exceed the loans balances outstanding.

17 Financial assets at fair value through profit or loss

	31 Dec. 2023 KD '000	31 Dec. 2022 KD '000
Local quoted securities	2,303	2,264
Foreign quoted securities	15,483	12,575
Local managed funds	26,706	50,444
Foreign managed funds	11,418	13,509
Fixed income securities	16,778	6,395
Equity participation	10,710	19,882
	83,398	105,069

The interest rates on fixed income securities range from 2.25% to 7.625% (31 December 2022: 2.25% to 7.625%) per annum.

During the year, the Group reclassified its certain investments including investment in Markaz Islamic Fund and Markaz Investment and Development Fund with a carrying value of KD22,653 thousand from financial assets at fair value through profit or loss to investment in associates, as the Group concluded that it exercises significant influence over the funds due to increase in its ownership interest during the year.

18 Financial assets at amortised cost

These represents foreign debt instruments amounting to KD4,302 (31 December 2022: KD1,976 thousand) carrying interest rate of 7.5% to 8% per annum (31 December 2022: 8% per annum).

19 Investment in associates and joint ventures

19 Investment in associates and joint ventures (continued)

20 Investment properties (continued)

At 31 December 2023, the fair value of the investment properties is KD36,914 thousand (31 December 2022: KD94,097 thousand). Investment properties were revalued by independent evaluators using a number of assumptions, including estimated rental revenues, capitalization yields, historical transactions, market knowledge, occupancy rates and cost of construction. The fair value is classified under level 2. In estimating the fair value of investment properties, the highest and best use is their current use. There has been no change to the valuation technique during the year.

During the year, the Group recognised a reversal of impairment losses of KD272 thousand (31 December 2022: KD442 thousand) in respect of certain investment properties.

Investment properties with carrying value of KD38,042 thousand (31 December 2022: KD17,481 thousand) were sold during the year for a consideration of KD49,733 thousand (31 December 2022: KD18,735 thousand) at a net gain of KD11,691 thousand (31 December 2022: KD1,254 thousand).

The rental income earned from the investment properties amounted to KD3,113 thousand (31 December 2022: KD4,928 thousand) and related direct operating expenses incurred amounted to KD921 thousand (31 December 2022: KD1,284 thousand).

Investment properties with carrying value of KD15,435 thousand (31 December 2022: KD22,600 thousand) are secured against bank borrowings (note 22).

The Groups investment properties are located as below:

	31 Dec. 2023 KD '000	31 Dec. 2022 KD '000

Reserves of the Parent Company equivalent to the cost of the treasury shares have been earmarked as non-distributable.

26 Reserves

The Companies Law and the Parent Company's Articles of Association require 10% of the profit for the year attributable to the owners of the Parent Company before KFAS, NLST, Zakat and Directors' remuneration is transferred to the statutory reserve. The shareholders of the Parent Company may resolve to discontinue such annual transfer when the reserve totals 50% of the paid-up share capital.

Distribution of statutory reserve is limited to the amount required to enable the payment of a dividend of 5% of paid up share capital to be made in years when retained earnings are not sufficient for the payment of a dividend of that amount.

According to the Parent Company's Articles of Association and the Companies Law, 10% of the profit for the year attributable to the owners of the Parent Company before KFAS, NLST, Zakat and Directors' remuneration is transferred to the voluntary reserve.

30 Segmental information

Operating segments are identified based on internal management reporting information that is regularly reviewed by the chief operating decision maker in order to allocate resources to the segment and to assess its performance, and is reconciled to Group's profit or loss.

The Group's business segments are summarised into Asset Management, Investment Banking and Corporate and other operations.

Asset Management segment includes MENA investments, International investments, Private equity, Real estate, Oil and gas, Custody and Fixed income.

Investment Banking segment includes Capital Markets, Advisory and M&A.

Others includes Treasury, Loan and Direct investments.

The revenues and profits generated from, and assets and liabilities allocated to, Group's business segments are as follows:

30 Segmental information (continued)

Segment income above represents income generated from external customers. There has no inter-segment income during the year and previous year.

For the purposes of monitoring segment performance and allocating resources between segments:

- There are no assets used jointly by any reportable segment.
- There are no liabilities for which any segment is jointly liable

31 Fiduciary accounts

The Group manages portfolios on behalf of others, mutual funds and maintains cash balances and securities in fiduciary accounts, which are not reflected in the consolidated statement of financial position. Assets under management at 31 December 2023 amounted to KD1,211,966 thousand (31 December 2022: KD1,153,963 thousand) which includes related party assets under management at 31 December 2023 amounted to KD437,901 thousand (31 December 2022: KD416,508 thousand). The Group earned management fee of KD7,174 thousand (31 December 2022: KD10,598 thousand) from the asset management activities.

	amounts (liabilities) amoun		amounts (liabilities) amounts		amounts (liabilities) amoun			Assets/ (liabilities) KD'000
Forward foreign exchange contracts	10,717	26	10,710	69				

34 Risk management objectives and policies

The Group's activities expose it to variety of financial risks: market risks (including foreign currency risk, interest and profit rate risk, and equity price risk), credit risk and liquidity risk.

The Board of Directors of the Parent Company is ultimately responsible for setting out risk strategies and objectives and policies for their management. The Group's risk management is carried out by the central risk management function and focuses on actively securing the Group's short to medium term cash flows by minimizing the potential adverse effects on the Group's financial performance through internal risk reports which analyse exposures by degree and magnitude of risks. Long term financial investments are managed to generate lasting returns.

The most significant financial risks to which the Group is exposed to are described below:

34.1 Market risk

a) Foreign currency

The Group mainly operates in the GCC, USA, Europe and other Middle Eastern countries and is exposed to foreign currency risk arising from various foreign currency exposures, primarily with respect to US Dollar, Saudi Riyals, Euro and others. Foreign exchange risk arises from future commercial transactions, recognised assets and liabilities and net investments in foreign operations.

To mitigate the Group's exposure to foreign currency risk, non-Kuwaiti Dinar cash flows are monitored and forward exchanged contracts are entered into in accordance with the Group's risk management policies. Generally, the Group's risk management procedures distinguish short-term foreign currency cash flows (due within twelve months) from longer-term cash flows. Where the amounts to be paid and received in specific currency are expected to largely offset one another, no further hedging activity is undertaken. Forward foreign contracts are mainly entered into for significant long-term foreign currency exposures that are not expected to be offset by other currency transactions.

34 Risk management objectives and policies (continued)

34.1 Market risk (continued)

a) Foreign currency (continued)

The Group had the following significant exposures denominated in foreign currencies, translated into Kuwaiti Dinar at the closing rate at year end:

	31 Dec. 2023 KD'000	31 Dec. 2022 KD'000
US Dollar	57,432	53,378
Saudi Riyals	2,905	2,628
Euro	15,224	11,599
Others	1,121	1,550

Foreign currency sensitivity is determined based on 2% (31 December 2022: 2%) increase or decrease in exchange rate. These have been no change during the year in the methods and assumptions used in preparing the sensitivity analysis.

If the Kuwaiti Dinar had strengthened/weakened against the foreign currencies assuming the sensitivity given in the table below, then this would have the following impact on the profit for the year:

	31 Dec. 2023		31 Dec. 2022	
	+ 2% KD'000	- 2% KD'000	+ 2% KD'000	- 2% KD'000
Profit for the year	(1,523)	1,523	(1,372)	1,372

Exposures to foreign exchange rates vary during the year depending on the volume and nature of the transactions. Nonetheless, the analysis above is considered to be representative of the Group's exposure to foreign currency risk.

b) Interest and profit rate risk

Interest and profit rate risk arise from the possibility that changes in interest and profit rates will affect future profitability or the fair values of financial instruments. The Group is exposed to interest and profit rate risk principally on its deposits, investments, bonds and bank borrowings which carry interest and profit at commercial rates. The Board has established levels of interest and profit rate risk by setting limits on the interest and profit rate gaps for stipulated periods.

Interest and profit rate sensitivity is determined based on 1% (31 December 2022: 1%) increase or decrease in interest and profit rate. These have been no change during the year in the methods and assumptions used in preparing the sensitivity analysis.

If Interest and profit rate had increased/decreased assuming the sensitivity given in the table below, then this would have the following impact on the profit for the year:

34 Risk management objectives and policies (continued)

34.1 Market risk (continued)

b) Interest and profit rate risk (continued)

	31 Dec	. 2023	31 Dec	c. 2022
	+ 1% KD'000	- 1% KD'000	+ 1% KD'000	-1% KD'000
Profit for the year	(188)	188	(385)	385

Provisions are monitored on a daily basis and hedging strategies used to ensure positions are maintained within established limits.

c) Equity price risk

This is a risk that the value of financial instruments will fluctuate as a result of changes in market prices, whether these changes are caused by factors specific to individual instrument or its issuer or factors affecting all instruments, traded in the market. The Group is exposed to equity price risk with respect to its listed equity investments which are primarily located in Kuwait, USA, and GCC. Equity investments are classified as "financial assets at fair value through profit or loss".

To manage its price risk arising from investments in equity securities, the Group diversifies its portfolio. Diversification of the portfolio is done in accordance with the limits determined by the Group. There have been no change during the year in the methods and assumptions used in preparing the sensitivity analysis.

The equity price risk sensitivity is determined on the exposure to equity price risks at the reporting date. If equity prices had been 2% higher/lower, the effect on the profit for the year would have been as follows:

Profit for	the year
31 Dec.	31 Dec.
2023	2022
KD'000	KD'000
± 356	±297

Financials assets at fair value through profit or loss

The Group's sensitivity to equity price risk in regards to its unquoted investments cannot be reliably determined due to numerous uncertainties and non-available of reliable information to determine future price of such investments.

34.2 Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Group credit policy and exposure to credit risk is monitored on an ongoing basis. The Group seeks to avoid undue concentrations of risks with individuals or Groups of customers in specific locations or business through diversification of its activities. It also obtains security when appropriate.

34 Risk management objectives and policies (continued)

34.2 Credit risk (continued)

The Group's exposure to credit risk is limited to the carrying amounts of financial assets recognised at the date of the consolidated statement of financial position, as summarized below:

	31 Dec. 2023 KD'000	31 Dec. 2022 KD'000
Bank balances	6,632	15,094
Time deposits	272	2,104
Accounts receivable and other assets (excluding prepayment and advance		,
payments)	5,430	5,318
Loans to customers	2,565	2,709
Financial assets at amortised cost	4,302	1,976
	19,201	27,201

Except for certain receivables and loans to customers referred to in note 15 and 16, none of the above financial assets are past due or impaired. The Group continuously monitors defaults of customers and other counterparties, identified either individually or by group, and incorporates this information into its credit risk controls. Where available at reasonable cost, external credit ratings and/or reports on customers and other counterparties are obtained and used. The Group's policy is to deal only with creditworthy counterparties. The Group's management considers that all the above financial assets that are neither past due nor impaired for each of the reporting dates under review are of good credit quality.

In respect of receivables, the Group is not exposed to any significant credit risk exposure to any single counterparty. Further details in relation to credit risk of receivables and loans to customers are disclosed in note 15 and 16 respectively. The Group's financial assets measured at amortised cost comprised of mortgaged note receivables and sukuk which are considered to be low credit risk investments. It is the Group's policy to measure such instruments on a 12-month ECL basis. However, the ECL provision on these balances are not material to the Group's consolidated financial statements. The credit risk for bank balances and time deposits is considered negligible, since the counterparties are reputable financial institutions with high credit quality and no history of default. Based on management assessment, the expected credit loss impact arising from such financial assets are insignificant to the Group as the risk of default has not increased significantly.

Information on other significant geographical concentrations of credit risk is set out in note 34.3.

34.3 Concentration of assets

The Group operates in different geographical areas. The distribution of financial assets which is exposed to credit risk by geographic region is as follows:

	31 Dec. 2023 KD'000	31 Dec. 2022 KD '000
Kuwait	7,597	11,669
North America	2,337	7,091
GCC	2,351	6,632
Europe	6,824	1,684
Others	92	125
	19,201	27,201

34 Risk management objectives and policies (continued)

34.4 Liquidity risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

Ultimate responsibility for liquidity risk management rests with the board of directors, which has built an appropriate liquidity risk management framework for the management of the Group's short, medium and long-term funding and liquidity management requirements. The Group manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities.

The table below analyses the Group's financial liabilities based on the remaining period at the financial position date to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

	Upto 1 month KD'000	Upto 1-3 months KD'000	3-12 months KD'000	Above 1 year KD'000	Total KD'000	Weighted average effective interest/profit rate %

34.5 Structured entities (Special Purpose Vehicle)

The Group has created certain Special Purpose Vehicles (SPVs) for the Group's asset management activities. These SPVs are used to raise funds from the Group's clients on the basis of product offering documents with eventual objectives of investments in specified asset classes as defined in the offering documents of the SPVs. These SPVs are managed on a fiduciary basis by the Group's asset management teams and as the Group does not control these SPVs as at the reporting date in accordance with the definition of control in IFRS 10, these SPVs are not consolidated into the Group's consolidated financial statements.

34 Risk management objectives and policies (continued)

34.5 Structured entities (Special Purpose Vehicle)

The Group's investments in SPV are subject to the terms and conditions of the respective SPV's offering documentation and, are susceptible to market price risk arising from uncertainties about future values of SPV's underlying assets.

The exposure to investments in SPVs at fair value, by strategy employed, is disclosed in the following table.

These investments are included in financial assets at fair value through profit or loss in the statement of consolidated financial position.

Funding Strategy	Type of activities	Number of SPVs	Fair value of Group's investment in SPVs KD '000	% of Net asset attributable to Group
Equity	Investment in real estate	12 (31 December 2022: 10)	6,942 (31 December 2022: KD9,826)	10.02% (31 December 2022: 19.51%)

Fair value measurement and summary of financial assets & liabilities by category

35.1 Categories of financial assets and liabilities

The carrying amounts of the Group's financial assets and liabilities as stated in the consolidated statement of financial position are as follows:

	31 Dec. 2023 KD'000	31 Dec. 2022 KD'000
Financial assets:		
Financial assets at amortised cost:		
- Cash and bank balances	6,639	15,112
- Time deposits	272	2,104
- Accounts receivable and other assets (excluding prepayment and advance	F 404	F 0.40
payments) - Loans to customers	5,404	5,249
- Financial assets carried at amortised cost	2,565	2,709
- Financial assets carried at amortised cost	4,302	1,976
Financial assets at fair value through profit or loss	83,398	105,069
Forward foreign currency contracts		
- At fair value (included under accounts receivables and other assets)	26	69
Total financial assets	102,606	132,288
Financial liabilities:		
Financial liabilities at amortised cost:		
- Accounts payable and other liabilities	8,299	9,956
- Bank borrowings	9,413	29,015
- Bonds issued	35,000	35,000
Total financial liabilities	52,712	73,971

Management considers that the carrying amounts of financial assets and financial liabilities, which are stated at amortised cost, approximate their fair values.

Fair value measurement and summary of financial assets & liabilities by category (continued)

35.2 Fair value hierarchy

Fair value represents the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Financial assets and financial liabilities measured at fair value in the consolidated statement of financial position are grouped into three levels of a fair value hierarchy. The three levels are defined based on the observability of significant inputs to the measurement, as follows:

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 fair value measurements are those derived from inputs other than quoted prices that are observable for the assets or liabilities, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).

The financial assets and liabilities measured at fair value on a recurring basis in the consolidated statement of financial position are grouped into the fair value hierarchy as follows:

		KD'C	000	
31 December 2023	Level 1	Level 2	Level 3	Total
Financial assets at fair value through profit or loss				
Quoted securities	17,786	_	-	17,786
Managed funds	_	38,124	-	38,124
Equity participations	-	-	10,710	10,710
Fixed income securities	15,178	-	1,600	16,778
	32,964	38,124	12,310	83,398
Derivative				
Forward foreign currency contracts held for trading	-	26	-	26
	32,964	38,150	12,310	83,424
31 December 2022				
Financial assets at fair value through profit or loss				
Quoted securities	14,839	_	_	14,839
Managed funds	692	63,261	-	63,953
Equity participations	-	-	19,882	19,882
Fixed income securities	4,495	-	1,900	6,395
-	20,026	63,261	21,782	105,069
Derivative				
Forward foreign currency contracts held for trading	_	69	-	69_
-	20,026	63,330	21,782	105,138

There have been no significant transfers between levels 1 and 2 during the reporting date.

Fair value measurement and summary of financial assets & liabilities by category (continued)

35.2 Fair value hierarchy (continued)

Measurement at fair value

The methods and valuation techniques used for the purpose of measuring fair value are unchanged compared to the previous reporting date.

a) Quoted securities

All the listed equity securities are publicly traded in stock exchanges. Fair values have been determined by reference to their quoted bid prices at the reporting date.

b) Unquoted securities

The consolidated financial statements include holdings in unlisted securities which are measured at fair value. Fair value is estimated using other valuation techniques which include some assumptions that are not supportable by observable market prices or rates.

c) Investments in managed funds

Investment funds managed by other mainly comprise of unquoted units and the fair value of these units has been determined based on net assets values reported by the fund managers as of the reporting date.

35.2 Fair value hierarchy (continued)

The following table gives information about how the fair values of these financial assets are determined (in particular, the valuation techniques(s) and inputs used).

Financial assets	Fair value as at	e as at				
	31 Dec. 2023	31 Dec. 2022	Fair value	Valuation technique(s)	Significant unobservable	Relationship of unobservable inputs to
	ND 000	KD 000	nierarcny	and key input (s)	input (s)	fair value
Financial assets at FVTPL:						
Quoted securities	17,786	14,839	_	Quoted bid prices	N/A	N/A
Managed funds		692	-	Quoted bid prices	N/A	N/A
Managed funds	38,124	63,261	2	NAV Basis	Net Assets Value	Net Assets Value
Fixed income securities	15,178	4,495	₹~~	Quoted bid prices	N/A	N/A
:					Cash flow estimate	Higher estimated cash flows and lower
Fixed income securities	1,600	1,900	က	Discounted cash flows	and discount rate	discount rate, results in higher fair value
					Discount for lack of	Lower discount rate, results in higher fair
Equity participations	10,710	19,882	ო	Adjusted NAV Basis	marketability	value
Derivative: Forward foreign currency contracts held for trading	26	69	2	Foreign exchange rate/ DCF method	N/A	N/A

The impact on consolidated statement of profit or loss and consolidated statement of profit or loss and other comprehensive income would be immaterial if the relevant risk variables used to fair value the level 3 investments were changed by 5%.

Fair value measurement and summary of financial assets & liabilities by category

35.2 Fair value hierarchy (continued)

Level 3 fair value measurements

The Group's financial assets and liabilities classified in level 3 uses valuation techniques based on significant inputs that are not based on observable market data. The financial instruments within this level can be reconciled from beginning to ending balances as follows:

	31 Dec. 2023 KD'000	31 Dec. 2022 KD'000
Opening balance	21,782	20,898
Net redemption	(6,919)	(5,159)
Reclassification*	(1,928)	6,119
Net change in fair value	(625)	(76)
Closing balance	12,310	21,782

^{*}During the year, investment amounting to KD1,928 thousand reclassified from level 3 to investment in associates (31 December 2022: reclassified from level 1 to level 3 KD6,119 thousand).

36 Operational risk

Operational risk is the risk of loss arising from inadequate or failed internal processes, human error, system failure or from external events. The Group has a set of policies and procedures, which are approved by the Board of Directors and are applied to identify, assess and supervise operational risk. The management ensures compliance with policies and procedures and monitors operational risk as part of the overall risk management.

37 Capital management objectives

The Group's capital management objectives are to ensure the Group's ability to continue as a going concern and to provide adequate return to its shareholders through the optimization of the capital structure.

The Group manages the capital structure and makes adjustments in the light of changes in economic conditions and risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividend paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

The Group's risk management reviews the capital structure on a semi-annual basis. As part of this review, the management considers the cost of capital and the risks associated with each class of capital.

The capital structure of the Group consists of the following:

	31 Dec. 2023 KD'000	31 Dec. 2022 KD'000
Bank borrowings and bonds issued Less: Cash and cash equivalents	44,413 (6,847)	64,015 (17,139)
Net debt	37,566	46,876
Total equity	112,834	133,273

Consistent with others in the industry, the Group monitors capital on the basis of the gearing ratio.

37 Capital management objectives (continued)

This ratio is calculated as net debt divided by the total equity as follows:

	31 Dec. 2023 %	31 Dec. 2022 %
Net debt to equity ratio	33.3	35.2
